2025

Christ (Deemed to be) University, Delhi NCR

Secured First Rank in Program

Concentration in Economics and Statistics; graduated with 9.66 (10 point scale)

Certifications

- Social Media Data Analytics - University of Washington (Coursera)
 - Applied Text Mining in Python - University of Michigan (Coursera)
 - Introduction to Python Programming – University of Pennsylvania (Coursera)
 - Generative AI for Everyone – DeepLearning.AI (Coursera)
-

Internships

HEAPS Health Solutions India Pvt. Ltd., Gurugram

May 14 to July 12 2024

- Built 3 interlinked Excel tracking systems (caller performance, cohort sizing, revenue) to support a patient outreach campaign spanning 1,000+ records across 4 disease-based patient groups (Diabetes, Cholesterol, PPI, Hemicolectomy).
 - Used Python (pandas) to clean and deduplicate call logs, standardize medical condition fields and flag data issues (invalid numbers, duplicate records) across weekly reports.
 - Created a weekly performance dashboard tracking call connect rates and reachability across 6 weeks of outreach, using KPI formulas (True Connect %, Reachability %, average call duration)
 - Built a cohort sizing model that updated target patient lists weekly by removing expired, unreachable, and excluded patients, improving targeting accuracy.
 - Built a revenue tracker linking call outcomes to hospital visits and billing data, sorted by revenue type to measure campaign impact.
-

Academic Projects & Achievements

- Rewarding Fathers, Penalizing Mothers – A Quantitative Evidence on the Unequal Gains of Parents in Indian Labor Market (2026) with Ashish Sharma and Swati Agrawal, published in ICT Analysis and Applications, Volume 1655: Proceedings of ICT4SD 2025 [Springer, Lecture Notes in Networks and Systems, pp. 396–405]
